

Our experience, your benefit.

How to contact us:

Our experience, your benefit.

A new generation of clay surface tennis courts!

We would like to introduce to you our company with this exclusive flyer. With our many years of experience, **SPORTAS** is an internationally recognized specialist in sports field surfacing. Apart from supplying and installing various sports surface systems worldwide, we also develop our own products and systems. Our key product is **TENNIS-FORCE®** floor surface. It goes without saying that we only use materials of the highest quality.

And we go that extra mile for you, too – you can count on us as your reliable partner even after your new floor surface has been installed. Give us a call and see for yourself what is possible!

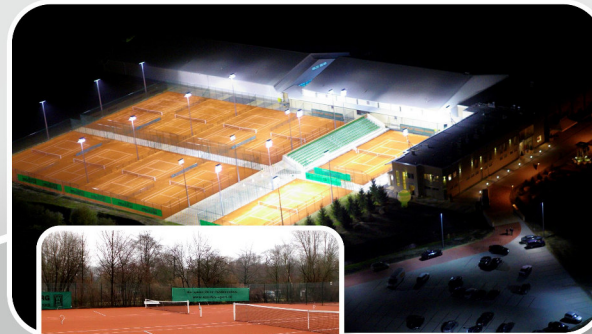

By the way: did you know that numerous Fed Cup and Davis Cup matches have been played on our innovative **TENNIS-FORCE®** court surface? And since 2009, every year the world's best tennis players compete against each other at the WTA-Porsche-Tennis-Grand-Prix in Stuttgart with our innovative court surface under their feet.

When will you choose **TENNIS-FORCE®** ?

We are looking forward to your contact.

Don't hesitate to call us on +49(0)2595/3869683. You can also visit our website www.tennisforce.de to find out more about our services and products.

AFTER

BEFORE

The Assembly

The basis of TENNIS-FORCE® ES is a new area-elastic 'basis cover', with a special base and anchorage area to accommodate the sliding layer. The unbound cover layer ensures perfect sliding and movement behavior. Since all materials are weather resistant the tennis court can be used all year round. And best of all: court preparation through watering is not required at all!

TENNIS-FORCE® ES Elastic Slide

- play characteristics comparable to a clay court
- joint- and muscle-friendly surface
- only minor maintenance required
- excellent water permeability
- same play characteristics during all seasons
- **no watering required**
- built-in marking lines
- long life, playable all year round
- pleasant look
- no major maintenance in spring
- low maintenance costs
- reduced waiting periods after rainfall

References on our website www.tennisforce.de and upon request!

OUTDOOR

TENNIS-FORCE®

- no major maintenance in spring
- playable all year round, for many years
- consistent ball bounce due to even surface, no more bad bounces
- play characteristics as on a normal clay court
- looks like a common clay court
- no damage to marking lines caused by freezing
- can be installed on existing clay courts,
- artificial turf and unbound base layer suitable for multi-purpose sports
- and wheelchair tennis

INDOOR

TENNIS-FORCE® HS Hydroslide

- clay surface for indoor tennis courts
- indoor installations require **no watering** due to special Hydroslide clay
- play characteristics as on outdoor clay courts
- excellent sliding behavior
- can be installed on unbound base layer as well as on old artificial turf and carpet surfaces ideal solution for air-inflated structures
- consistent ball bounce
- permanent, inlaid marking lines
- low maintenance
- gentle on joints and ligaments
